## SKILLS

**Problem Solving**

**Creativity/Design**

**Team Collaboration**

**Communication**

**Time Management**

## LANGUAGES

| | |
|---|---|
| **Bosnian** | Native |
| **English** | Fluent |
| **German** | C1 |
| **Turkish** | A2 |

## HOBBIES

Robotics research
Network programming
Web development
Technology innovation

## PROFILE

Final-year Computer Science and Engineering student at the International University of Sarajevo (IUS) with a diverse technical background spanning software development, data analysis, and network systems. Experienced in building full-stack applications, working with modern web technologies, and contributing to collaborative development projects through internships.
Currently expanding practical experience through industry work. Comfortable working across the full development lifecycle, from design and implementation to testing and deployment.
Strong problem-solving and teamwork skills, combined with a proactive approach to learning and adapting to new technologies. Multilingual communicator — fluent in English and Turkish, with advanced proficiency in German.

## EDUCATION

**Computer Science and Engineering, International University of Sarajevo, Sarajevo** September 2022 — Present
*Senior*

## WORK EXPERIENCE

**Zira, Zira Talent Academy, Sarajevo, Bosnia and Herzegovina** February 2026 — present
*Intern*

- Developing a full-stack game application within a team environment using Angular (TypeScript) and Spring Boot.
- Implemented dynamic frontend features using Angular components, routing, and RxJS for reactive data handling and API integration.
- Designed and consumed RESTful APIs (Spring Boot), applying layered architecture (Controller–Service–DAO) and JPA-based data access.
- Worked with relational databases using DBeaver and implemented efficient queries with JPQL, including filtering and similarity-based logic.
- Collaborated in an agile development environment, contributing through code reviews, debugging, and iterative feature improvements.
- Utilized tools such as IntelliJ IDEA, Maven, and Fork for development, build management, and version control workflows.

**BH Telecom Sarajevo, Bosnia and Herzegovina** April 2025 — May 2025
*Intern* *Directorate for Network Infrastructure*

- Assisted in configuring and monitoring IP/MPLS networks, supporting routing, switching, and network optimization tasks.

**Exchange Office Sarajevo GUGO d.o.o , Bosnia and Herzegovina** July 2024 - October 2025
*Full-Time*

- Processed incoming and outgoing cash transactions, including withdrawals and deposits to and from partner banks.
- Maintained precise financial records, balanced cash registers, and prepared daily transaction reports.
- Provided professional customer service by assisting clients with currency exchange inquiries and rate information.

## ★ PROJECT EXPERIENCE

**Hand Gesture Controlled Robot** *May 2025*

*Embedded Systems Course & Robotics Club Project*

- **Technologies:** Python, C++, OpenCV, MediaPipe, Arduino Uno, 28BYJ-48 stepper motors, ULN2003 drivers
- Developed real-time computer vision system using MediaPipe and OpenCV to recognize finger counting gestures (1-5) with 90% accuracy
- Implemented Arduino-based embedded control system with serial communication protocol for robot locomotion and steering
- Integrated four stepper motors in custom chassis configuration for precise movement control including forward motion, turning, and braking mechanisms
- Successfully demonstrated real-time gesture-to-motion translation with 160ms total system latency, combining computer vision, embedded programming, and robotics hardware integration

**Smart Restaurant Reservation System** *April 2025*

*Software Engineering Course Project*

- **Technologies:** React.js, Next.js, Node.js, Express.js, MySQL, Tailwind CSS, JWT
- Developed full-stack web application with intelligent restaurant recommendation engine based on user preferences and cuisine filters
- Implemented secure user authentication, real-time table availability checking, and comprehensive reservation management system
- Designed responsive UI/UX with role-based access control for customers, restaurants, and administrators
- Team Role: Full-stack development including Figma design, frontend UI, backend API design and database architecture

**TravelConnect – Full-Stack Social Travel Platform**

Web Application Development Project *December 2025*

- **Technologies:** React.js, Node.js, Express.js, PostgreSQL, Tailwind CSS, Framer Motion, JWT, Multer
- Developed a comprehensive social media web application for sharing travel experiences, featuring geographic-based content organization and real-time social interactions.
- Architected a relational database using PostgreSQL to manage structured location data, user-generated posts, and complex social relationships (follows, likes, comments).
- Implemented secure user authentication via JWT and bcryptjs, along with robust file upload functionality using Multer for photo-based posts.
- Designed a dynamic, responsive UI with Tailwind CSS and Framer Motion, featuring a discovery feed, location-based filtering, and interactive notification systems.
- **Role:** Lead Full-stack Developer responsible for the end-to-end lifecycle, including database schema design, RESTful API development, and frontend UI/UX implementation.

## ★ TECHNICAL SKILLS

- **Programming:** Python, C/C++,Java, JavaScript, HTML/CSS
- **Robotics & Embedded Systems:** Arduino, ESP32, OpenCV, MediaPipe, TensorFlow, stepper motors, sensors
- **Web Development:** React.js, Angular, Node.js, Express.js, Spring Boot, Tailwind CSS, Framer Motion
- **Database:** MySQL,PostgreSQl
- **Tools & Platforms:** Git/GitHub, GitLab, Fork, IntelliJ IDEA, DBeaver, Arduino IDE, Visual Studio Code, LaTeX, Figma, Canva
- **Network Programming:** Cisco Packet Tracer
- **Data Analysis and Business Intelligence:** Weka (data mining, classification, clustering), BI concepts

## LEADERSHIP & ACTIVITIES

- Training & Mentorship: Helped new employees learn company procedures and cash-handling policies.
- Decision-Making: Took initiative in resolving customer issues and ensuring client satisfaction.
- Responsibility & Accountability: Managed large sums of cash and ensured full compliance with internal policies.
- Multilingual Communication: Supported customers in multiple languages, improving accessibility and service quality.
- Customer Relationship Management: Built positive relationships with clients through professional communication and trust.
- Supported daily operations within the IP/MPLS Network Department, assisting staff in administrative and customer service tasks
